

1. What are your ties to your home country? Including ties to family, community, employment, and economic circumstances.

I have strong ties to India, particularly in my hometown of Lunawada, Gujarat, where my family permanently resides. My father works as a school principal, my mother is a teacher, and my sister is an Ayurvedic doctor. My entire family and close relatives live in India, and I share strong emotional and family responsibilities with them.

My family owns our residential house in Lunawada as well as another house in our native village, along with family property there. These assets further strengthen my economic and social ties to India. Professionally, I am currently pursuing my Bachelor of Technology in Information Technology from Dharmsinh Desai University and will complete my degree in May 2026. I have also gained internship experience as a MERN Stack Developer. India's rapidly growing IT industry provides strong career opportunities aligned with my qualifications.

These strong family, property, and career ties clearly demonstrate my genuine intention to return to India after completing my studies.

2. Explain the reason why you wish to study this course in Australia with this education provider and your understanding of the requirements of the intended course and studying and living in Australia

I chose to study the Master of Information and Communications Technology in Australia because of its globally recognized education system, practical learning approach, and strong industry connections. After completing my Bachelor of Technology in Information Technology from Dharmsinh Desai University, I wanted to gain advanced knowledge in modern technologies such as artificial intelligence, machine learning, data analytics, and cybersecurity.

I selected the University of the Sunshine Coast because its Master of ICT program includes subjects such as Machine Learning, Cybersecurity, Data Visualisation, and Artificial Intelligence, which strongly align with my career goals. Through my research on the university's official website and course handbook, I learned that the program emphasizes practical learning, industry projects, and research-based assignments.

I also understand that studying in Australia requires maintaining full-time enrollment, complying with student visa conditions, maintaining Overseas Student Health Cover (OSHC), and managing living expenses responsibly while adapting to a multicultural learning environment.

3. Explain how completing the course chosen will benefit you

Completing the Master of Information and Communications Technology at the University of the Sunshine Coast will help me gain advanced knowledge and practical skills in modern technologies such as artificial intelligence, machine learning, data analytics, and cybersecurity. These skills will build upon my Bachelor of Technology in Information Technology from Dharmsinh Desai University and my internship experience as a MERN Stack Developer.

The course includes subjects such as Machine Learning, Cybersecurity, Data Visualisation, and Artificial Intelligence, which will enhance my analytical thinking, programming ability, and problem-solving skills.

After completing my studies, I plan to return to India and pursue a professional career in the rapidly growing IT sector, where professionals with international qualifications and advanced technical skills are highly valued. This degree will improve my career prospects and help me secure responsible technical roles in the technology industry.

4. Why did you decide not to study in your home country? Have you done any research on the similar courses available in your home country? Please explain.

I researched postgraduate IT programs in India, including those offered by institutions such as the Indian Institutes of Technology (IITs) and National Institutes of Technology (NITs). While these universities offer reputable programs, many courses focus more on theoretical knowledge and provide limited specialization in emerging technologies.

I wanted a program that offers stronger practical exposure and specialized learning in modern areas such as artificial intelligence, machine learning, and cybersecurity.

The Master of ICT at the University of the Sunshine Coast offers subjects such as Machine Learning, Cybersecurity, and Data Visualisation with an industry-focused learning approach. This practical and globally oriented education will help me develop advanced technical skills and prepare me for career opportunities in India's growing technology sector.

5. How does this course fit with your study/employment history?

The Master of Information and Communications Technology at the University of the Sunshine Coast closely aligns with my academic background and current experience. I completed my Bachelor of Technology in Information Technology from Dharmsinh Desai University, where I developed a strong foundation in programming, databases, networking, and software development.

During my studies, I also worked on several academic projects related to web development and software applications, which helped me gain practical knowledge of programming and system development. These projects strengthened my problem-solving abilities and increased my interest in advanced technologies.

Currently, I am gaining practical experience through my internship as a MERN Stack Developer, where I work with technologies such as MongoDB, Express.js, React.js, and Node.js to develop web applications and contribute to real-world projects.

The Master of ICT program will allow me to build upon my existing technical knowledge and project experience while developing advanced skills in areas such as artificial intelligence, data analytics, and cybersecurity. Therefore, this program is a logical continuation of my academic and professional journey.

6. What will you do when you finish this course?

After completing the Master of Information and Communications Technology at the University of the Sunshine Coast, I plan to return to India and pursue a career in the IT industry. India's technology sector is growing rapidly, particularly in areas such as artificial intelligence, data analytics, and cybersecurity.

With my Bachelor of Technology in Information Technology from Dharmsinh Desai University, combined with the advanced technical knowledge and international exposure gained during my master's program, I will be well prepared to work in professional roles within software development and emerging technology fields.

My long-term goal is to work with leading technology companies in India, gain industry experience, and gradually grow into senior technical roles in the future.
