DETAILED DAY WISE REPORT:

DURATION: - 29/12/25 To 10/01/26

DATE	WORK DONE (in detail)
29/12/25	Initialized the project repository and reviewed the overall project structure to understand module organization and code separation.
30/12/25	Studied the existing frontend UI flow and analyzed how different components interact within the application.
31/12/25	Reviewed backend folder structure and understood the purpose of controllers, routes, and middleware.
01/01/26	Analyzed database schema and data models used in the project to understand data flow and relationships.
02/01/26	Worked on understanding API endpoints and tested basic API requests using sample data.
05/01/26	Reviewed authentication and authorization flow used in the project at a high level.
06/01/26	Debugged minor issues in frontend components under guidance and improved code readability.
07/01/26 - 08/01/26	Studied the project deployment configuration and environment variable management for development and testing environments.
09/01/26	Documented understanding of project work-flow and discussed next development tasks with the project guide.
10/01/26	Reporting
